

# Zedbed - Made In Canada High Quality

These days it's hard to find a lot of things that are still made in Canada as most companies source out their materials and manufacturing.

This Canadian company, Zedbed, is a manufacturer of high quality mattresses and pillows which are made in Canada using their own materials that are, you guessed it, also made in Canada. Since they have control over every step of the manufacturing process you know that their quality control and customer service will be second to none.

So what makes Zedbed so special?

Zedbed has revolutionized the memory foam formula and has created five different types of soy-based and latex foams - ZX, R2, PURE, Latex Series and VX Series.

PURE Series was the first

eco-friendly, high-density memory foam created by Zedbed and people instantly approved. Zedbed's PURE Series provided a mattress that fit like a glove.

R2 Series is the ultimate in elegance and luxury as it uses Zedbed's PURE memory foam. This foam is the best-performing as it always returns to its shape faster than standard memory foam.

ZX Series uses an eco-friendly, high-density hybrid ZX foam that has been created by Zedbed. It provides a lovely cushiony softness that conforms to your body's contours providing a relaxing and comfortable sleep

The Latex Series uses a natural latex, not memory foam within. The Latex Series was developed for people who prefer a semi-firm to firm mattress when sleeping. Since latex

*You'll sleep cooler, you'll be more comfortable and you will wake up refreshed when you sleep on a Made in Canada Zedbed.*

conforms well to your body shape, pressure points are eliminated and latex is also hypoallergenic, cool to sleep on and dust mite-resistant.

The VX series uses a new material that provides a mattress that does not react to body heat or ambient air which means you'll remain cooler in the

summer's heat. The mattress is made with thousands of cells that enable air to flow freely through the mattress.

Along with mattresses and pillows made with Zedbed's exclusive foams, Sleep Experts also carries Zedbed's full line of adjustable beds, foundations and headboards, all of which are also fully manufactured and assembled in Canada.

There are models from each Zedbed series in the showroom so you can take the time to try them all out and we'll take the time to share our expertise to help you decide which model will best suit your sleeping habits, health needs to give you the best night's sleep.
