

# Sleep Healthy with an Organic Mattress

Every OrganicPedic® mattress made in their facility, which is the first and only large-scale Eco-Factory™ in North America, is made by hand by expert artisans, using the purest raw materials available.

OrganicPedic® mattresses are available in every size from crib to California king, and custom sizes can be ordered.

How to ensure your mattress choice is really organic:

Natural rubber latex should come from the sap of sustainably harvested rubber trees, not from petroleum industry by-products.

Organic cotton used in the mattress as batting and coverings should also be certified. Manufacturers like OMI that make the OrganicPedic® mattresses use the best premium virgin cotton available and have developed a

sanitizing system that uses a non-chemical process.

Look for wool used in the construction which is untreated and, as in the case of OrganicPedic®, is harvested from organically raised sheep that have been humanely treated.

OrganicPedic® mattresses provide excellent back support because the mattress will contour to the natural shape of your spine. For those suffering from arthritis and diabetes, OrganicPedic® mattresses offer superior pressure-point relief. The Eco-Wool™ fill

of the mattresses also helps to regulate your body temperature. Another reason to choose an organic mattress is that they are naturally mould, mildew and dust-mite resistant and since there are no chemicals used in the manufacturing process, people, especially those

with allergies will not be exposed to harmful toxins found in many other types of traditional style mattresses.

One of the big bonuses of an organic mattress is that because all natural materials are used they last

years longer than their synthetically made counterparts.

OrganicPedic® mattresses are available at Sleep Experience in a variety of styles which include exclusive cushion quiltings, removable pillow tops and even mattresses with personalized sleep zones which means you decide how soft or firm you want your mattress to be.

Just because there's a picture of a planet an organic sticker on a mattress doesn't mean it really is organic. Drop in to Sleep Experience and we'll show you that our OrganicPedic® mattresses meet and exceed numerous and stringent organic certification standards. Don't forget to relax and test one out while you visit.
